

EXTENTIA

Information Technology

From the CEO's desk:

Hello and welcome to another update from Extentia, We've been quiet for a while, but not inactive. It seems fitting that as the rains come to India, flooding our streets and ensuring a productive year of growth ahead for the country, that we should do the same.

An active start to 2010 has resulted in press coverage of Extentia that we are happy and excited to share with you. With the memory of a slow 2009 fading, we've had the pleasure of welcoming and hosting several partners, interns and speakers at Extentia, and you can read more about that below. And as always, we want to make sure that in our packed lives and busy schedules we find time to do the right thing – Sakaar continues to do great work in serving the needs of the disadvantaged and gives Extentia's more ways to get involved and make a difference in our communities.

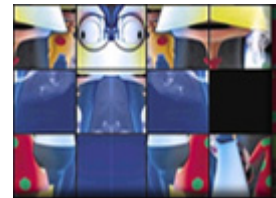

We look forward to communicating with you more and more – as we get things done and share ideas on the future of technology in our lives. As always, we welcome your opinions and comments and expect to hear from you.

Umeed Kothavala, CEO
